Wave-equation snapshots

12 Hz Ricker source · Three-layer model · Native receiver fields

Acoustic

p (Pa)

A = 1.85 Pa

Elastic

v_z (m/s)

A = 7.16e-08 m/s

Vertical force source

VTI

sV (Pa)

A = 0.00049 Pa

sH + sV source

VRZ

p (Pa)

A = 1.85 Pa

VRR

p (Pa)

A = 1.85 Pa

GSLS

p (Pa)

A = 1.51 Pa

Color = field / A. A is the maximum absolute amplitude across the three snapshots in each row. Linear scale; no clipping.

Separate field units and source conventions; amplitudes are not comparable across rows. Dashed lines: layer interfaces. +: source.
